Squeegee	:	Soft-Medium Durometer
Stencil	:	Water-resistant
Wash-up	:	Water / Mild detergent
Reducer	:	Water upto 2-3%
Curing / Fusion	:	320° f /160° C
Ph Value	:	8 – 8.5

## Application:

Texaprint R.P is thick highly covering paste and Prints when activated by heat, expands and create embroidery type effect, for this effect the Printed motif should be exposed to the temperature of 120 c -150 c , required fixcer is to be added before printing.

Pot life of paste after adding Fixcer is around 8 -10 hrs.

Care must be taken to check the required fastness properties before production as fastness varies on different fabrics also finish on the fabric affect the fastness.

Shelf life: Texaprint is not subject to a particular limitation of its shelf life, as the ink contains water. It must be protected from fungus. We recommend to close opened cans very thoroughly.

Mix well before use.
